

CONSULTING SERVICES

Bio-Ops, LLC. strives to provide the most comprehensive and professional services available. In order to provide the most reliable service we must maintain compliance with all regulatory agencies.

We can help your business avoid costly and lengthy downtime by ensuring that your company is up to date with these compliance issues. We not only provide training to keep employees updated with current changes, but we also provide management with the proper information and tools necessary to prevent non-compliance based fines and delays.

We can provide you with:

Plans & Policies:

- Bloodborne Pathogen Plans
- Exposure Control Plans
- Emergency Medical Response Plans
- Hazard Communication Plans
- Material Safety Data Sheets

TRAINING
consultation

What can **Bio-Ops** training do for you and your group?

Help you maintain compliance!

If you are a professional with certifications or licenses, chances are you need to receive some type of continuing education credits. If you are a business owner, manager, or supervisor, chances are you need to keep training records for OSHA compliance.

Either way **Bio-Ops** can provide you or your group with accredited training to ensure that all your certifications, licenses or OSHA requirements are maintained or updated.

What can you expect from a **Bio-Ops** training course?

Proven professional results!

Bio-Ops is comprised of instructors from various emergency service disciplines. We have dedicated our lives to saving lives and helping our communities. Our instructors have **over 50 years** of combined multi-disciplined knowledge and experience ready to assist you.

Every course we teach has been perfected over the years by experts and has been accredited by national associations dedicated to the health and safety industry.
